OSGR STARTER MOTOR

RAC511

Porsche 356 B, 356 C & 356 SC 6 volt negative earth applications. Strong, powerful, offset gear-reduced starter motor, delivering huge cranking torque through a set of steel internal gears. Lightweight, compact and durable this unit starts the engine faster with immense power, whilst drawing less current from the battery. All built by us in the UK!

All Porsche 356 B, C and SC models originally used a **6-volt negative-earth electrical system**. Porsche did not switch to 12 volts until the introduction of the Porsche 911 and Porsche 912 range. The Bosch **0 001 207 002 (SR21X)** starter is therefore a 6V unit suitable for all of the Porsche 356 applications below.

Also known as:

Bosch OE:

0.001.207.002

0001207002

Porsche OE:
