

STARTER MOTOR ACCESSORIES

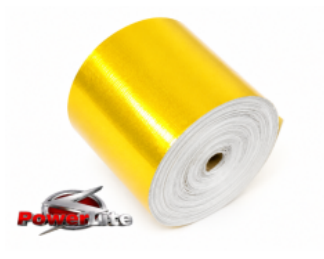

PHS-222030

Powerlite gold Reflective Heat Tape is a state of the art polymer laminated glass cloth that can be cut and tailored for your own specific requirements; it is easily applied and can be used for a wide variety of applications that are prone to extensive heat exposure.

It is capable of handling continual operating temperatures of 850°F and the reflective gold surface will deflect away 80% of all radiant heat.

Material : Fibreglass

Size : 50mm x 9000mm
