

MADE IN UK

## Powerlite LiFePO4 Lithium Ion Batteries General Information.

- All Powerlite performance batteries are constructed using high rate LiFePO4 cells. This technology has a high instant discharge current and can be quickly charged. Also, if kept in the correct manner and conditions, the batteries will suffer minimal power shortage if left unused.
- LiFePO4 technology is the safest form of Lithium battery.
- Powerlite batteries are equipped with electronic systems to protect against overcharging, over discharging and short circuit.
- Powerlite batteries are equipped with a voltage indicator to test the battery's condition. This **MUST** be switched off after checking.
- The terminals are made of fine grade copper to ensure perfect contact and current flow. If using additional washers or existing cable terminals ensure they are clean, dry and free of corrosion.

**CERTIFIED**
