High Torque Starter Motors

RAC412

Direct Replacement for original starter. Fitted with multi drilled face plate to allow the unit to be mounted in multiple positions. See RAC411 for Automatic gearbox

Ford GT40 V8 Manual gearbox. Incredibly powerful, offset gear-reduced starter motor. Based on a "Denso" style unit, this starter delivers huge cranking torque through a set of steel internal gears, drawing less current from the battery versus an original unit. Lightweight, compact and durable this unit uses minimum efficiency whilst delivering maximum power and has dual polarity.
