High Torque Starter Motors

RAC479

Direct replacement for original unit for Magneti Marelli MT21F 18/12D9 CHECK THE NUMBER OF TEETH BEFORE FITTING

Incredibly powerful, offset gear-reduced starter motor. Based on a "Denso" style unit, this starter delivers huge cranking torque through a set of steel internal gears, drawing less current from the battery versus an original unit. Lightweight, compact and durable this unit uses minimum efficiency whilst delivering maximum power and has dual polarity.
