

# High Torque Starter Motors

## RAC811

Exclusively available from Powerlite, yet another “Slimline” unit that is a straight replacement for the MGB / MGC originally fitted with the pre-engaged starter. Weighing just 3.0 kg, the Slimline comes fitted with a “multi-mount” adaptor plate for easy fitting in tight situations – perfect for motorsport applications where space is at a premium. Although small and compact, this Slimline unit is deceptively powerful, kicking out 1.6 kW of high torque power from the epicyclic gearbox. Coming soon – watch this space! Designed for neagive earth vehicles only

All MGB and MGC vehicles that were fitted with a pre-engaged starter motor. Negative earth only.
